

SOLUTION CHART - PEST CONTROL

This chart will help you choose the product that most closely matches your needs. Find your pest problem at the top of the chart; chart cells in that column with a dot indicate that the product in that row is intended by the manufacturer to address that pest problem. Always check the product label and confirm that the product is allowed by your certifying agency. *We do our best to update our solution charts with current status with OMRI, WSDA, CDFA and NOP. However, the status of any product can change at any time, so use this chart only as a guideline.* If there is no part number listed there are several products available - search the title listed to find your options. Our list of invertebrate pests are the most common problematic pests. For a complete list of the pests controlled by a product, go to groworganic.com, type in the part number, and look at the manufacturer's product label.
